

September 2018 conference speech.

Conference—as we sit here , the world around us is changing fast at a frightening rate -

And I don't mean technologically---

But ideologically—

So we as a socialist party, a party for the many and not just the few, must remain true to our values and principles and we can only do this with Jermyn Corbyn as our leader—

look what's happening in Trump,s America—

He is busy banning the Muslims, building walls and starting an international trade war.

And Throughout the European continent, xenophobia and hatred against people who look different is on the rise.

Neo-Fascism is taking over, and minorities are suffering.

Think back to 50 years ago, and that famous speech by a certain Tory politician of another age—that river Tiber is foaming with blood-

That sort of hatemongering is taking place today in Germany, Denmark, and most worryingly in Hungary—and yet Michael Gove refused to condemn Hungarian Prime Minister Victor Orbán.

Everyone knows that this Hungarian government is anti-democratic, Islamophobic, anti-EU values, refugees hating except for the Tories. It's a scandal!

Tories are not moving to the right it is a right wing party--

The Toxic Tories are back with a vengeance, and yet they're still chasing after minority communities for their votes.

That's why I want to speak directly to my Sikh friends throughout the country.

The Sikh faith has strong values about caring and sharing- helping the needy with food and shelter- looking after the disadvantaged, and seeing all of humanity as equals.

Those values are the very same as those of the Labour Party.

As Sikhs, we should stand with Jeremy Corbyn and work hard to get him all the way to Number 10.

The only reason Tories are cosy up to you is because they want your vote. They don't care about you or your loved ones.

They might smile in front of your face, but they snarl at you as soon as you turn your back.

If they think that women in face veils look like letterboxes, I wouldn't even dare to imagine what they think of bearded men in turbans.

So Come on board with Jeremy Corbyn and let's make this country, our country,

a country to be proud of, and a country that is tolerant and inclusive, a country truly believe in EQUALITY.

Thank you.
